

Four-Year Graduation Plan - Courses and Critical Benchmarks

The following is a sample course of study. It is the Student's responsibility to ensure that all program requirements are met. This guide is not a substitute for academic advisement. **All incoming freshmen must develop an academic plan (which maps out all courses needed to graduate within your intended major/degree). Your academic advisor is available to meet with you and create your specific plan.**

*Your path to graduation may vary slightly based on factors such as college credit you earned while in high school, transfer work from other institutions of higher learning and placement in Mathematics. You are responsible for checking prerequisites to any courses. Critical Courses and minimum recommended grades (as noted below) provide feedback regarding major fit and help indicate likelihood of successful completion of chosen academic program and degree.*

### Policy

The School reserves the right to make changes in courses, degree requirements and course schedules without notice.

Students are expected to maintain a quality of achievement significantly above minimum UMKC standards for degree work. Individual student progress will be monitored throughout the program. Satisfactory progress is required of all students for retention in the program. Students are expected to maintain academic standards, perform satisfactorily in courses, refrain from academic dishonesty, comply with the established University and teacher education timetables and requirements, and refrain from unethical or unprofessional behavior or behaviors that obstruct the training process or threaten the welfare of the student or others. Other circumstances involving student behavior will be addressed by the faculty on an individual basis.

### Program Description

The Department of Economics is committed to promoting excellence in broad-based undergraduate programs; graduate and interdisciplinary doctoral education; research; and community, university and professional service. The department focuses its research, teaching and service efforts on the urban mission of the University by fostering a diversity of research and teaching perspectives for faculty and students.

The department offers programs leading to a Bachelor of Arts, Master of Arts and Interdisciplinary Ph.D., in Economics. We are dedicated to offering our courses so that our degrees can be completed either through day or evening classes. It also provides undergraduate service courses to the College of Arts and Sciences, the Bloch School, and the School of Computing and Engineering. Undergraduate majors participate in a variety of visiting lecture programs and faculty colloquialism through the Economics Club and the Omicron Delta Epsilon (the economics honorary society). We have several economics scholarships available to those who have completed at least 60 hours towards their degree and are in good academic standing.

The B.A. program requires a minimum of 36 hours of courses in the department. A minimum 2.0 GPA in the major is required for graduation. Students may choose among several emphases that are available: The general emphasis gives the student a wide variety of choices of courses and he/she will be exposed to a myriad of ideas, theories and important economic issues. Students may focus their studies in one of three distinct emphases within the major. The Urban Economic Development emphasis provides a high value-added program option that focuses on urban and regional economic issues. The Money & Finance emphasis enhances the student's knowledge and exposure to issues related to money, finance, banking and related fields. The Political Economy emphasis provides opportunities for students to study issues related to politics and economics. Each of these emphases will prepare students for positions in business, government, law and other related fields.

### Admission Requirements

We admit students who are incoming freshman and have met the university requirements. We also admit transfer students with or without an associate's degree.

### Academic and Career Advising

Because an Economics course of study involves critical thinking and problem-solving skills, graduates from our program are much in demand by businesses, both private and public. Our undergraduate degree recipients have worked in local banks,

investment firms, local non-profits, government organizations and many other private and public institutions. An Economics degree also allows you to be flexible in your choice of graduate and professional career paths. Our internship program will help launch our students into their careers.
