Four Year Graduation Plan – Courses & Critical Benchmarks:
The following is a sample course of study. It is the student’s responsibility to ensure that all program requirements are met. This guide is not a substitute for academic advisement. For more information see the University Catalog at umkc.edu/catalog.

Your path to graduation may vary based on factors such as college credit you earned while in high school, transfer work from other institutions of higher learning, and placement in Mathematics. You are responsible for checking prerequisites to any courses. Critical Courses and minimum recommended grades (as noted below) provide feedback regarding major fit and help indicate likelihood of successful completion of chosen academic program and degree.

Please Note: Students must have successfully passed (with a “C-” or better) Pre-calculus or a combination of a College Algebra and Trigonometry for college credit to be prepared for major math sequence. Students who do not place into MATH 210 Calculus I or MATH 216 Calculus for Biological Sciences may have to complete preparatory math coursework, adding 3 – 8 hours to the total hours required for the degree.
